

What is Apisolis?

Apisolis is an innovative device designed for beekeepers, intended to replace the traditional smoker. It generates a gentle vapor to calm the bees while being more respectful of users' health. The device was created by French entrepreneur Damien Albrespy, who developed Apisolis with the aim of helping beekeepers by providing a safer, healthier and more convenient alternative for managing their hives.

How does Apisolis work?

Apisolis uses patented technology that diffuses a safe white vapor unlike the traditional smoker that burns fuels.

What are the advantages of Apisolis compared to the traditional smoker?

Apisolis is safer for health as it does not produce smoke. It is also more convenient, easy to use, and does not require fuel. It turns on and off very quickly, making it more environmentally friendly.

Is Apisolis harmful (harmless) to bees?

No, Apisolis is safe for bees. The vapor it diffuses has a calming effect like traditional smoke but without the harmful effects.

How do you service Apisolis?

Apisolis requires very little maintenance. It is recommended to carry out complete recharging cycles during the first weeks of use to optimize battery life. Once use is complete, it is best to clean any traces of liquid from the tank and container connectors. Do not use any liquid to clean Apisolis.

How long does the Native liquid bottle last?

The Native liquid bottle allows for visiting approximately 250 hives, while one tank refill lasts for about 40 hives, depending on usage frequency.

Is Apisolis environmentally friendly?

Yes, Apisolis is environmentally friendly. It works without combustion, reducing carbon footprint and particulate emissions. Additionally, tanks are refillable.

Is Apisolis easy to use for beginners?

Yes, Apisolis is designed to be very intuitive. You just press 3 times on the bellow to activate the device, and it operates like a traditional smoker. It is particularly appreciated by beginner beekeepers for its simplicity.

What is the battery life of Apisolis?

Apisolis has a battery life of several hours on a single charge. A tank allows you to visit approximately 40 hives

Does Apisolis require a preheating time like a traditional smoker?

No, Apisolis is ready for use instantly. There is no need to wait for it to turn on, making it much more convenient than the traditional smoker.

Is Apisolis compatible with all types of beekeeping?

Yes, Apisolis is suitable for all types of beekeeping, whether commercial, amateur, or organic.

Can Apisolis be recharged with an external battery (power bank)?

No, it is not recommended to use it with an external battery, as it may put the original battery into safety mode.
