

9 1/8" PRO FEEDER

with Cap and Ladder

Better Feeding for Better Bees

Durable, easy-to-clean design for healthier hives.

Frame feeders, often called division board feeders, are placed inside the hive, replacing a frame. A popular choice among beekeepers is the Pro Feeder, designed to minimize drowning risks with built-in ladders and floaters.

Placement:

- Inside the hive in place of a frame

Assessability:

- Close proximity to the brood nest provides easy access for your bees, allowing feeding during cooler temperatures. Hive cover must be removed for refilling.

Key Benefits:

- Fewer refills
- Longer feeding
- Secure fit keeps brood out
- Easy use ladder minimizing drowning
- Textured interior walls
- Fits snug using 9 Frames

FD505 | 1 gallon, takes the place of one frame
(fits snug with 9 frames in a 10 frame box)

FD525 | 1.5 gallon, takes the place of two frames
(fits loose with 8 frames in a 10 frame box)

FD545 | 2 gallon, takes the place of two frames
(fits snug with 8 frames in a 10 frame box)
