

# TOP FEEDER

*with Painted Super*

*Improved Mann Lake Top Feeder Insert* features a galvanized steel safety screen designed to reduce bee drowning.

This top feeder is constructed of heavy-duty, single-piece plastic to provide a no-leak reservoir! The painted wooden frame measure  $4\frac{5}{8}$ " deep (11.43cm) and fits all standard beekeeping equipment. There is no comparison to the strength and durability this hive top feeder provides over foam top feeders.

With this setup, your bees can access their syrup through a steel safety screen, keeping them confined and preventing drowning. Save time with a high-capacity feeder for apiaries that holds 4 gallons of bee food for the 10-frame option and 3.2 gallons for the 8-frame one.

*Placement:* Sits on top of the uppermost brood box

*Accessibility:* Easy to refill and access

*Capacity:* 10 Frame up to 4 Gallons | 8 Frame up to 3.2 Gallons

## *Key Benefits:*

- Fill the feeder without opening the hive
- One-piece construction prevents leaking
- Painted wooden surrounding measures  $4\frac{5}{8}$ "  $\times$   $19\frac{5}{8}$ "
